

Cisco AnyConnect VPN Setup for Mac OS

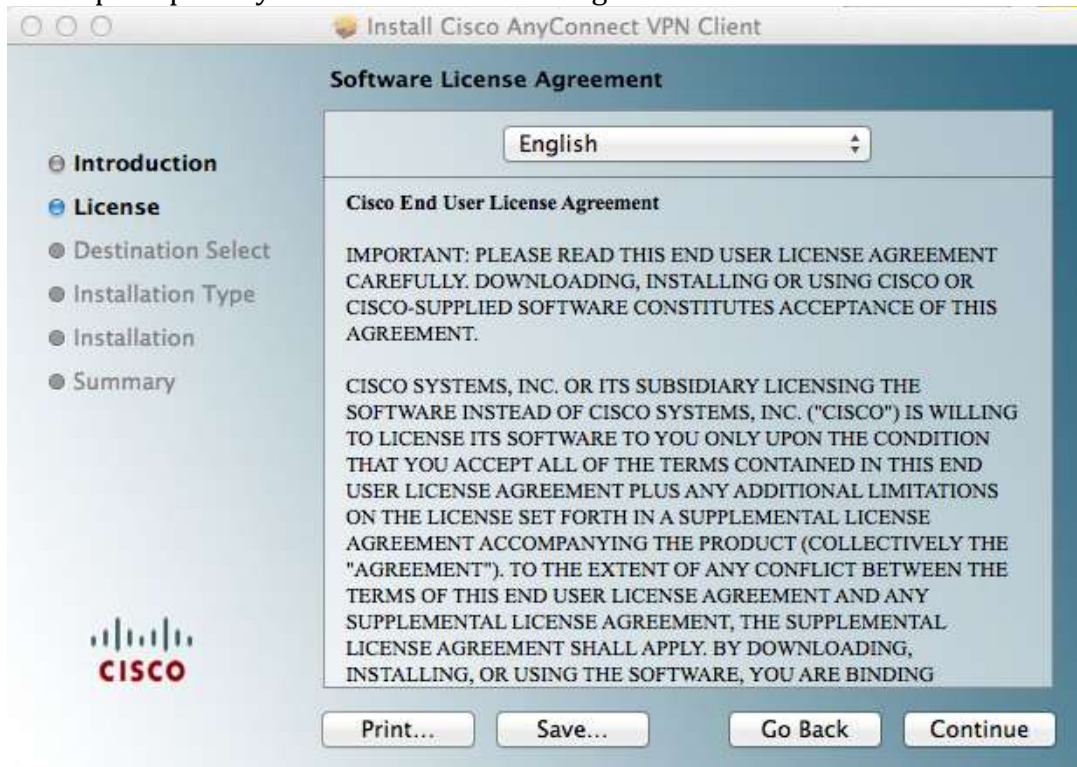

1. Download the Cisco Any Connect VPN Client from:
<http://www.uchastings.edu/about/admin-offices/it/docs/anyconnect-macosx-3.0.3.dmg>
2. Open the DMG file after it has downloaded
3. Double click the VPN.pkg file

4. Click Continue when the Installer prompts with “This package will run a program to determine if the software can be installed”.

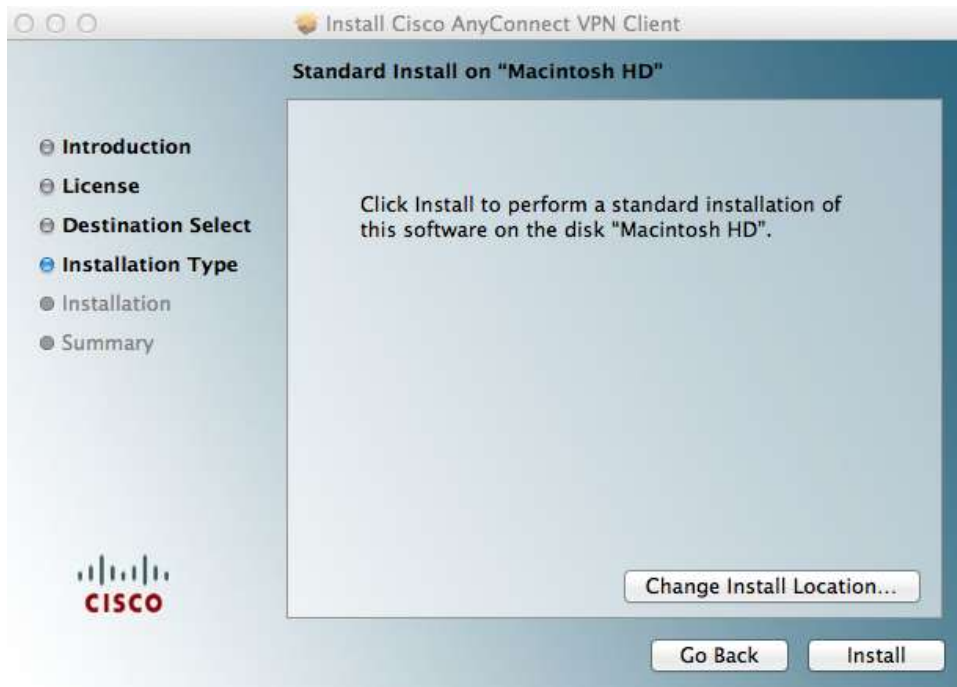

5. When prompted by the End User License Agreement click continue.

6. Click Agree

7. Click install

8. Enter your Computer's user/pass when prompted

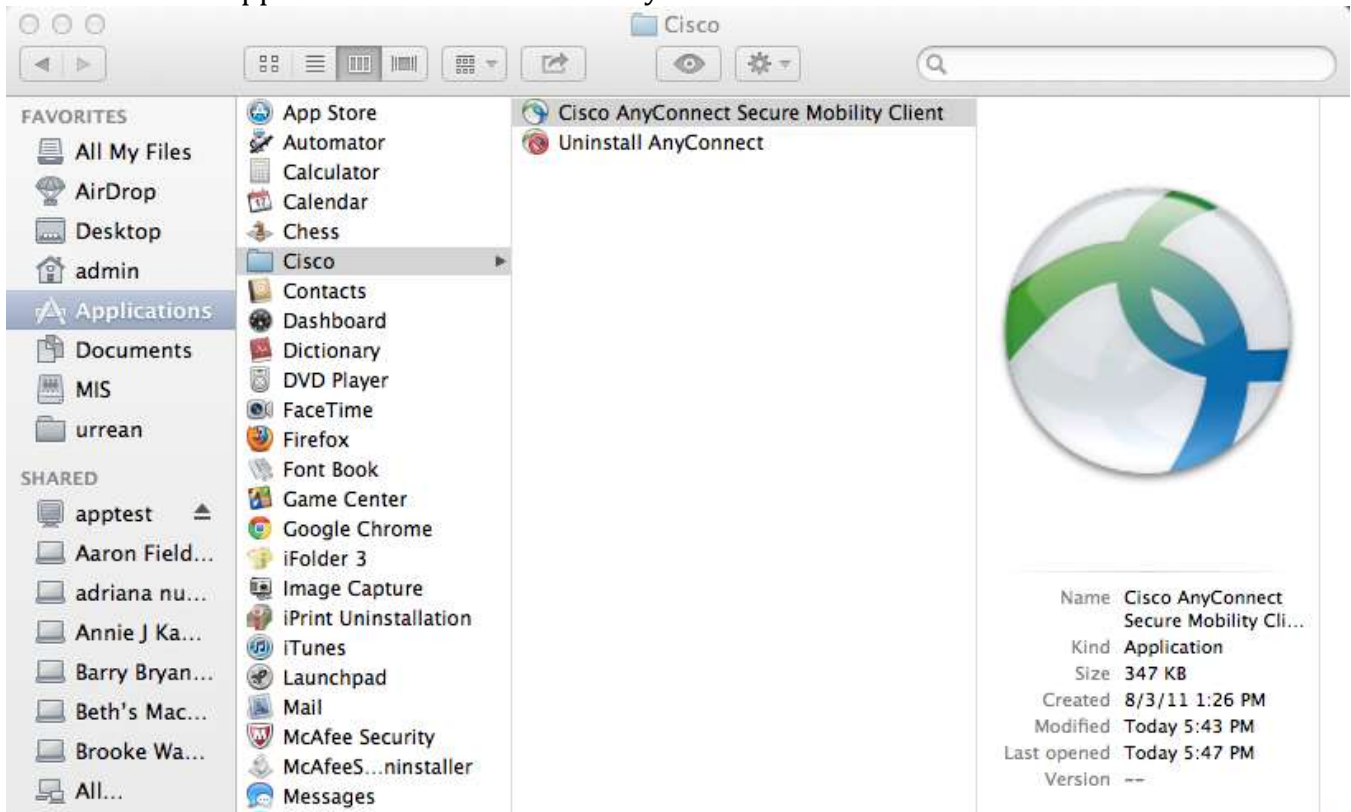

9. When the installer finishes you will see the successful message.

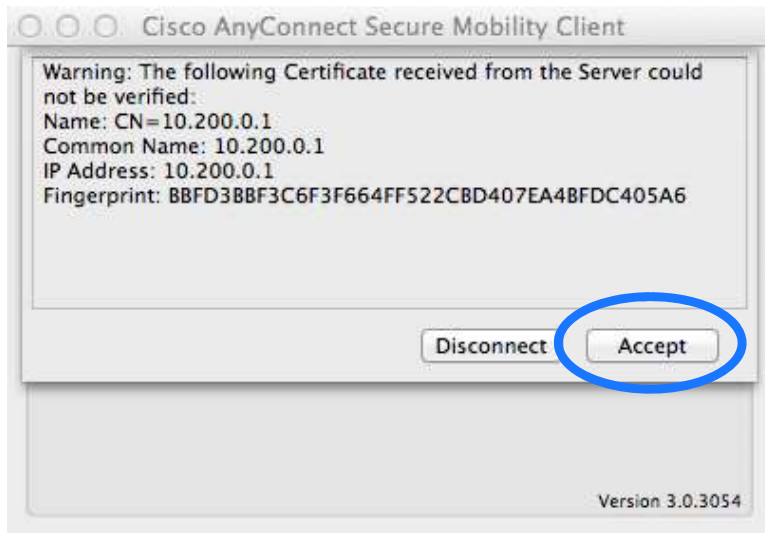

10. Open the Cisco AnyConnect VPN Client.

11. It will be under Applications > Cisco > Cisco AnyConnect Client

12. When prompted by the certificate click Accept.

13. Enter the following into the Cisco AnyConnect Secure Mobility Client:
Connect to: dragon.uchastings.edu
Group: VPN-Hastings
Username: email username
Password: email password.

14. When you are connected to the VPN you will see a Globe with a lock in it

15. Click the Cisco Any Connect VPN Client and click disconnect to disconnect from the VPN.

**You can find the Cisco AnyConnect VPN Client under Applications > Cisco.
It is best to add the Cisco AnyConnect VPN to your tray or make an Alias and drag it to your desktop.**

How the Cisco Any Connect VPN Client should look when opening.

Connect to: dragon.uchastings.edu
